N-27—The Hopi Indians live upon seven high, flat topped mesas of No. Arizona, and are easily accessible to New Mexico travelers. The "wise" Burro is as much a part of the peculiar existence of this tribe of "peaceful people" as their very strange, hand built rock and adobe homes, perched about 500 ft. in the sky upon these formidable mesas. The semi-arid country of Tusayan is the quaintest and most colorful in the Southwest and these burros are part of it.

HOPI INDIAN BURRO

Every time he steals into the Corn-field a portion of his ear is cut off. This one is an old Offender.
